Email: rywang@umd.edu, ruiyuwang\_work@outlook.com

## Education

Postdoc researcher, University of Maryland, College Park Advisor: Prof. Pratyush Tiwary	2022 - Present
Ph.D. in Chemistry, Temple University Advisors: Prof. Eric Borguet, Prof. Vincenzo Carnevale	2022
M.Sc. in Chemistry, Nankai University Advisor: Prof. Tianying Guo	2016
B.Sc. in Chemistry, Nankai University	2013

## Publications ([Google Scholar](#))

## Research interests

- Molecular Dynamics Simulations
- Machine Learning based Enhanced Sampling
- Water, Interfaces, and materials
- Generative AI
- Nucleation

## Research experience:

- **Investigation of nucleation of NaCl at various environments using machine learning-assisted enhanced sampling molecular dynamics simulations** (U. of Maryland, 2022-2025)  
I designed enhanced sampling molecular dynamics (MD) simulations to study the phase transition of NaCl aqueous solutions. By utilizing high-dimensional simulation data with appropriate machine learning, I quantified the role of solutes during nucleation processes,

which is often overlooked before. Additionally, I designed simulations to reveal how nanoconfined materials promote nucleation.

- **Predicting phase diagram using generative AI** (U. of Maryland, 2024-present)  
I developed structural descriptors for Lennard-Jones particles and trained a generative AI model capable of predicting a complete phase diagram using just two data points. The AI model successfully reproduces the behavior of Lennard-Jones particles. Currently, I am tuning the model to extend its capabilities to more complex molecules.
- **Biomolecule adsorption and the origin of life** (Temple University, 2019-2023)  
I designed enhanced sampling MD simulations to investigate the aggregation of glycine, which is extremely rare in bulk water. My simulations demonstrate that the adsorption, self-assembly, and dissolution of amino acids at water/oxide interfaces drives the enrichment of biomolecules, a critical step in the abiogenesis process.
- **Water wetting and ion adsorption at water/solid interfaces** (Temple University, 2016-2022)  
I developed in-house Python code to analyze the structure and dynamics of interfacial water. I calculated the nonlinear optical response, which matches experimental measurements and received highly positive feedback from reviewers of JACS. Additionally, I developed a graph model to measure the universal high connectivity of interfacial hydrogen bond networks quantitatively.
- **Calculation of bulk water pKa using DFT-MD** (Temple University, 2018)  
I conducted DFT-MD simulations and modified the Quantum Espresso code to collect forces during constraint-MD, enabling the calculation of the free energy surface for the self-ionization of bulk water.

## Awards

- Doctoral Dissertation Completion grant. Temple University, 2022
- College of Science and Technology Outstanding Research Assistant (RA) Award. (1 winner from all PhD students in the department) Temple University, 2021
- The Daniel Swern Research Award. Temple University, 2021
- Student Travel Awards: GEOC ACS Spring 2020 Philadelphia. ACS, 2019
- Presidential Fellowship. Temple University, 2016
- TEDA-Asymchem Scholarship. Nankai University, 2014
- The Third Prize of Excellent Undergraduate Scholarship in the academic year of 2011-2012. Nankai University, 2012
- The Second Prize of Excellent Undergraduate Scholarship in the academic year of 2010-2011. Nankai University, 2011
- The Second Prize of Excellent Undergraduate Scholarship in the academic year of 2009-2010. Nankai University, 2010

## Presentations

- Investigation of nucleation and assembly at nanoscaled aqueous interfaces using AI augmented enhanced sampling
  - Postdoctoral Research Symposium, University of Maryland 2024
  - Gordon Research Seminar (**discussion leader**) & Gordon Research Conference 2024
- On the Role of  $\alpha$ -Alumina in the Origin of Life: Surface Driven Assembly of Amino Acids
  - ACS (spring) National Meeting (**ACS student travel award winner**) 2021
- Water hydrophilic behavior at aqueous/alumina interfaces
  - ACS (spring) National Meeting 2021
  - ACS YCC Poster Session, Philadelphia 2020
- Ion Solutions at Mineral/Water Interfaces: Bridging the Gap between Computational Modeling and Spectroscopy
  - ICCAS Beijing, China 2019
  - ICMS, Temple University 2019
- First Principles Calculation of Water pKa Using the Newly Developed SCAN Functional
  - SCAN Workshop, Temple University 2019
  - Penn Conference in Theoretical Chemistry, University of Pennsylvania 2019
- Investigation of the charged  $\text{Al}_2\text{O}_3(0001)$  surface in acidic and basic solutions by ab initio MD simulations
  - Penn Conference in Theoretical Chemistry, University of Pennsylvania 2018
- Ion adsorption and water dynamics near  $\alpha$ -alumina (0001)/water interface
  - ACS YCC Poster Session, Philadelphia 2018
- Ion adsorption and water behavior near  $\alpha$ -alumina (0001)/water interface
  - ACS National Meeting, Washington, D.C. 2017
  - Penn Conference in Theoretical Chemistry, University of Pennsylvania 2017
- Adsorption of Sodium Halides to the Water-Air and Water-Alumina Interfaces
  - ACS YCC Poster Session, Philadelphia 2017
  - Water Workshop, Temple University 2017

## Skills

GROMACS, VASP, Quantum-Espresso, Gaussian 09, CP2k, ChemOffice  
C++, Python (Numpy, sklearn, Keras, Pytorch), C, Linux

## Professional Affiliations

Member of American Chemical Society, the Electrochemical Society, American Physical Society, Python Software Foundation

## Service

Reviewing Proc. Natl. Acad. Sci. U.S.A, J. Chem. Theory Comput, J. Chem. Phys, and J. Phys. Chem.
